

## MVP RESCUE LADDER

Easily being the most versatile apparatus available, the MVP Rescue Ladder is available with up to 500 gallons on a single rear axle and up to 250 cubic feet of storage. This unit is available with the standard 77 foot heavy duty aerial device, but is also available with a 57 foot aerial.

The low crosslays are easy to deploy and safer to reload while standing on the street. The MVP's pump is a traditional shaft driven midship, ratable up to 2250 gpm. Its quiet, rattle-free gearbox takes stress away from the pump operator and lets him concentrate on the job at hand.

## SPECIFICATIONS

Chassis:	Cinder and Igniter up to 450hp, Inferno up to 600hp, Ultra up to 500hp
Body:	Extruded Aluminum
Compartments:	6 compartments left, 4 compartments right plus EZ-Stack hose bed, 4 compartments rear
