## **REV FIRE GROUP INTRODUCES SMART FLO™, A NEW INTEGRATED PRESSURE GOVERNOR SYSTEM FOR FIRE APPARATUS**

**OCALA, FL – August 5, 2021** – REV Fire Group, made up of E-ONE®, KME®, Ferrara™, Spartan Emergency Response®, Smeal™, and Ladder Tower™, launches Smart Flo™, a new integrated pressure governor system now offered on its fire apparatus that puts the operator in command with total system control in one location.

This advancement in pressure governor technology integrates several functions on the pump panel to aid the operator. With one press of a button, Smart Flo goes through the steps of engaging the pump, providing tank water, and recirculating water, allowing firefighters to respond even faster when arriving on scene. This not only increases speed and safety at the fire scene but provides a new level of protection for the pump.

“Smart Flo represents the type of industry-changing technology that we are focused on – features that make a real difference in how the firefighter can perform without hidden drawbacks or compromises,” said Roger Lackore, Senior Director of Product Development for REV Fire Group. “Anytime we can provide an innovation like Smart Flo that allows firefighters to be more efficient and effective, we believe we have a big win for the fire service and their local communities.”

The new Smart Flo™ integrated pressure governor system can feature:

- One-button pump shift
- Auto tank recirculation
- Auto tank-to-pump opening
- Integrated foam system control
- Camera display from other areas around the apparatus

Smart Flo works by opening the tank to pump line to ensure the pump is flooded and ready when your crew needs water. It also monitors the water temperature in your pump housing and automatically opens a recirculation line to keep your pump cool.

Operators have the choice of adjusting discharge pressure via the Smart Flo touch screen or they can do it manually with the twister control. The generous 7-inch display screen can also feature camera feeds from the blind sides of the apparatus, creating a safe and more efficient work environment.

Smart Flo will be introduced and on display at [FDIC International](#) (Fire Department Instructors Conference) in Indianapolis, Indiana from August 5 – 7, 2021. For more information, visit booth #3637, or contact an E-ONE, Ferrara, KME or Spartan Emergency Response dealer.

### **About REV Group, Inc.**

REV Group<sup>®</sup> companies are leading designers and manufacturers of specialty vehicles and related aftermarket parts and services. Our companies serve a diversified customer base, primarily in the United States, through three segments: Fire & Emergency, Commercial, and Recreation. They provide customized vehicle solutions for applications, including essential needs for public services (ambulances, fire apparatus, school buses, and transit buses), commercial infrastructure (terminal trucks and industrial sweepers) and consumer leisure (recreational vehicles). REV's diverse portfolio is made up of well-established principal vehicle brands, including many of the most recognizable names within their industry. Several of our brands pioneered their specialty vehicle product categories and date back more than 50 years. REV Group trades on the NYSE under the symbol REVG.
